## PERSONAL PROJECTS

---

### Music Player Web App |

- Tech Stack : HTML, CSS, JavaScript and React.js
- Developed a responsive and interactive web-based music player with essential playback features(Play, Pause, Next, Previous).
- Integrated audio controls using JavaScript and provided real-time UI updates based on audio state.

### Portfolio |

- Tech Stack : HTML, CSS, JavaScript, Vite
- Developed a personal portfolio website to showcase my frontend development skills and completed projects.
- Implemented a responsive and mobile-friendly layout to ensure smooth experience across all screen sizes.
- Highlighted projects with live links and added a clear, modern UI to demonstrate UI/UX understanding.

### E-Commerce Website |

- Tech Stack : HTML, CSS, JavaScript
- Developed a fully responsive e-commerce web page designed for a fictional clothing brand called **"Male Fashion"**.
- Implemented key sections like Top Sale, New Arrivals, Hot Sales, and a Contact Us form to simulate a real shopping experience.
- Focused on layout structuring, responsive design, and enhancing UI/UX for better user engagement.
- Developed additional projects including a - Calculator  , Rock Paper Scissors game  , Currency Converter  , Amazon Clone  etc. to reinforce JavaScript and DOM manipulation skills.
